Vitax

# Lawn Clear 2

## Ready to Use

**INSTRUCTIONS FOR USE**

**When to use:** Kills many common broad-leaved weeds including plantain, creeping buttercup, white clover, common dandelion and daisy.

Apply once a year between April and October when the soil is moist and weeds are leafy and actively growing.

Do not apply in windy weather. Take extreme care to avoid drift onto crops and non-target plants outside the target area. Keep spray off cultivated plants and away from ponds and watercourses. Keep children and pets away from treated area until spray has dried.

**Where to use:** Kills weeds present at the time of treatment, but does not prevent weeds from germinating. A second application, of another product, may be required after 6-8 weeks to kill stubborn weeds like buttercup and any weeds that may have germinated later. Test for turf safety on a small area of turf before using over a wide area.

Do not mow for 3 days before and 3 days after treatment. Do not spray lawns which are less than one year old.

Allow at least six weeks between treatment and overseeding established turf. Do not treat during drought, freezing conditions or in periods of prolonged cold weather.

Land treated with this product should not be sown or planted with broad-leaved plants for a period of 6 months after application.

**How to use:** Shake well before use. Adjust the nozzle to spray and hold approximately 30 cm above the target weed; pump the trigger firmly to thoroughly cover weeds without run-off. Avoid production of a fine spray that can drift onto neighbouring plants. Maximum individual dose 40 ml/m² with a maximum of one application per season. After treatment, leave the clippings from the first mowing on the lawn. The next three mowings should be composted well, for at least 9 months, before being used as a mulch. Do not dispose of the grass clippings via council composting schemes.

**Risk and Safety Information**

Keep out of reach of children.
Keep away from food, drink and animal feedingstuffs.
If swallowed, seek medical advice immediately and show this container or label.
This material and its container must be disposed of in a safe way
To avoid risks to man and the environment, comply with the instructions for use.
